

YES Community Counseling Center's PACT Project and The Long Island Prevention Resource Center Present

Teen Intervene

A Free Evidence-Based Virtual Training

Tuesday, December 1st, 11:30am-2:45pm

Wednesday, December 2nd, 11:00am-2:45pm

(Must attend both days for CEU/ CPP/ CPS/ CASAC hrs)

This training is open to School Social Workers, Teachers, Guidance Counselors, Psychologists, Nurses, Coaches or licensed Substance Abuse Prevention and Treatment providers. Participants should have formal training in basic counseling skills, as well as a basic understanding of the etiology, course, and treatment of adolescent alcohol and substance abuse and work with youth ages 12-19.

At the end of this training participants will be able to:

- Explain seven key clinical skills of effective adolescent counseling
- Describe developmental characteristics of adolescents
- Explain how brain development affects adolescent behavior
- Give an overview of the background and research behind brief intervention
- Apply the basic tools of brief intervention, including motivational enhancement techniques (MET)
- Identify the pros and cons of substance use with the adolescent
- Develop short terms goals with the adolescent to reduce and/or abstain from alcohol and other substances
